

At L&J we offer the full range of mechanical services: pipework, metal fabrication and fume and dust extraction.

L&J Mechanical Services were established in 1990 and rapidly gained a reputation for high quality work, exceptional service and attention to detail. The company expanded rapidly as the quality of work, coupled with its extremely competitive rates, continued to attract an ever-increasing number of small to medium sized business clients as well as international giants as customers.

Equally as important to L&J are small businesses requiring limited solutions. L&J bring decades of experience and practical, hands-on expertise to every job - however large or small. Although L&J's principal trading area is central and southern England and South Wales, the company is large enough to undertake contracts anywhere in the UK.

Pipework Services

L&J supply, install and commission a comprehensive range of pipework for numerous applications. We can provide designs and drawings where needed, as well as O&M manuals for substantial products.

Process Pipework

L&J provide pipework to suit existing machinery, and where appropriate can offer a design facility. Whether you are upgrading plant, enhancing efficiency, or starting from scratch; we have all the design, fabrication and installation skills you need. Our expertise includes:

- Compressed air systems
- Steam and compressed pipework
- Hot cold and chilled water systems
- Welded and screwed pipework
- Pipework for natural gas and specialist gases
- Thermal insulation for pipework

Heating and ventilation

We supply and fit a wide range of equipment for industrial and commercial applications. Our expertise covers:

- Gas fired heating: free blowing and ducted
- Radiator systems
- Hot water systems via radiators
- System heating
- Fan cool units
- Air handling units
- Conditioned air systems
- Boiler servicing

L&J Mechanical & Steel Fabrication Services Limited

Unit 7, Lynton Road

Extraction

L&J design and build bespoke extraction systems to suit your particular application and premises. L&J's installations range from a single means of capture at source to a whole scheme for removing toxic fumes and airborne dust from the working environment.

This enables manufacturing and engineering companies to operate within the COSHH regulations, and reduces the dangers to workers' health.

Designing for your need

You may be setting up an operation, wishing to upgrade your existing extraction system or unsure where you stand legally in terms of the COSHH regulations. We can give you:

- A free risk assessment check; which identifies sources of contamination
- A comprehensive risk assessment, by a qualified specialist for a fee
- A full on-site consultation free of charge
- Free equipment catalogues showing the range of equipment and applications
- A full design and installation service for whatever system you need

Metal Fabrication

We are specialist manufacturers of purpose-made metalwork items for Architectural use.

We work closely with our clients throughout all phases of design, metal fabrication, supply and installation. This has enabled us to respond successfully to some very exciting and often bespoke commissions.

Products include:

Metal Fabrication: Staircases, Balustrades, Handrails, Canopies, Balconies, Cladding Panels, Ladders, Gates Railings.

Sheet Metalwork: Food Counters, Specialised Ductwork, Guards, Chutes, Hoppers, Cabinets, Tables, Shelving, Display Units, Cladding Panels.

Structural Steelwork: Steel Frames, Roof Trusses, Walkways, Access Platforms, Secondary Steelwork

Design

You can present your proposals to us as detailed specifications or just tell us what you have in mind and we'll take care of the rest. We pride ourselves on our ability to design and manufacture to our customers' requirements and if required we will produce working drawings, prototypes and samples. We are happy to advise early on in the design process, and can suggest materials, method of fabrication and finishes. It is at this early stage that our experience pays off, as we are often able to help clients avoid costly mistakes.

Installation

If required, we can offer a complete installation service anywhere in the UK. We will arrange delivery from our Swindon site, and ensure the product arrives in perfect condition. We have many years experience working with contractors, government bodies, and the final customer during the crucial stage of installation.
